Licensing Notes for i5 and zSeries

Availability of PDFlib 7

PDFlib 7 licenses are still available despite the release of PDFlib 8. PDFlib 7 availability depends on whether or not the customer has an active support agreement. PDFlib 7 licenses purchased after December 31, 2009 are not eligible for free updates to PDFlib 8 (even with active support).

Customer already has...	PDFlib 7 is available until...
no PDFlib 7 licenses	January 2010
PDFlib 7 licenses without support	November 2010
PDFlib 7 licenses with active support	October 2011 (end of lifetime for PDFlib 7)

Products

Our main software line is available in three different flavors:

- PDFlib includes a variety of functions for generating PDF output.
- PDFlib+PDI includes all PDFlib functions, plus the PDF Import Library (PDI) for including existing PDF pages in the generated output. It also includes the pCOS interface for querying PDF objects.
- PDFlib Personalization Server (PPS) includes PDFlib+PDI plus functions for automatically filling PDFlib Blocks. A PPS license also covers the PDFlib Block Plugin for creating Blocks interactively with Adobe Acrobat on Mac and Windows.

A detailed feature comparison is available in the product documentation and on our Web site. PDFlib, PDFlib+PDI, and PPS are distributed as a combined binary which is fully functional, but displays a demo stamp across all generated pages unless a valid license key is applied. The pCOS interface for querying PDF objects is contained in the evaluation versions, but it is limited to small documents. According to your order the license key will activate PDFlib, PDFlib+PDI, or PPS.

Value added Tax (VAT)

Like all EU businesses, PDFlib GmbH's invoicing and VAT handling is governed by EU law:

- Customers from non-EU countries will not be charged VAT.
- Customers from Germany will be charged 19% VAT (MwSt.).
- Customers from all other EU countries must provide their VAT identification number to avoid VAT being added to the invoice.

Support

We offer optional support contracts in combination with a new product license, or to renew an existing support contract. Customers with an active support contract will benefit from the following advantages:

- technical support with short response times
- all minor (maintenance) and major (functional) updates included
- early availability of bug fixes
- maintenance releases and technical support available until the end of a product's lifetime
- additional licenses can be purchased until the end of the lifetime

For a detailed description of support benefits please refer to our General License and Support Conditions which are available on our Web site. The support fee is 18% of the license fee per year.

Support contracts can optionally be renewed automatically every 12 months until the support is expressly terminated by the customer. In order to terminate a support agreement with automatic renewal please inform us one month before the support expires.

Server Identification

Please enter the serial number, model, and processor feature of the target server (for i5/iSeries) or CPU ID (for zSeries) in the designated form fields on the previous page. The purchased license will be bound to the server identified here. It will cover all logical partitions (LPARs) on the identified server. Instructions for determining the server ID can be found on the FAQ section of the PDFlib Web site.

Server Platform

Please check the appropriate box for the target system (i5/iSeries or zSeries). For zSeries you must also know the Mips number of the target system. You will receive a system-specific license key which must be applied according to the documentation. We support a wide variety of additional operating systems. Please review the information on our Web site if you are interested in using PDFlib products on other platforms.

Volume Discount / Backup Server Discount

Volume discounts are available for multiple licenses of the same product, provided all licenses are ordered with a single combined order. Please contact us for details.

Licenses for backup machines are available at 85% discount off the list price, provided the backup machine is never used concurrently with the main production machine.

Upgrades to a higher Product

An upgrade changes an existing license for a PDFlib 7 product to a license for a more advanced product on the same platform. An upgrade invalidates the old license. All licenses can be upgraded at a reduced fee. The following table indicates the fees for various upgrade combinations as a percentage of the target product's list price:

To	Upgrade from	
	PDFlib 7	PDFlib+PDI 7
PDFlib+PDI 7	35%	—
PPS 7	50%	25%
