PLOP/PLOP DS 4.1, March 2011

All sales are governed by our General License and Support Conditions (available at www.pdflib.com). You will not receive any physical media, but must download the software from our Web site. We will send you an invoice with the license key. This form is valid until December 31, 2012.

PDFlib GmbH München, Germany • President: Thomas Merz • Incorporation: München HRB 129 497

PDFlib® PLOP / PLOP DS

Licensing Notes

Products

All PLOP packages contain combined binaries which cover two products (see below for a more detailed feature description):

- PLOP is a versatile tool which can repair, linearize, optimize, encrypt, and decrypt PDF documents, and deal with XMP metadata;
- PLOP DS (Digital Signature) offers all features of PLOP plus the ability to apply digital signatures to PDF documents.

Both products can be evaluated without a license, but some features are restricted unless a valid license key is applied (see manual).

According to your order the license key will activate PLOP or PLOP DS.

PLOP Features

PDFlib PLOP is engineered for server and desktop use and offers the following features:

- PDF linearization for fast Web delivery (byteserving).
- Optimization: reduce the file size of PDF documents without affecting quality.
- Protection: encrypt or decrypt PDF documents and apply or remove permission settings, such as »printing not allowed« or »content extraction not allowed«.
- Repair mode: automatically detect damaged PDF documents and fix the problems if possible.
- PDF analysis: query arbitrary properties of a PDF document.
- Document info entries: query, add, or replace document info entries.
- XMP metadata: add XMP and synchronize document info.

PLOP DS Features

PLOP DS (Digital Signature) offers all features of PLOP plus the ability to apply digital signatures to PDF documents. Signatures can be created from digital IDs in the PKCS#12 and PFX certificate formats. On Windows digital IDs from the Windows certificate store can be used. On Windows, Linux, and Solaris secure cryptographic tokens with PKCS#11 support can be used (e.g. a smartcard or USB token).

Value added Tax (VAT)

Like all EU businesses, PDFlib GmbH's invoicing and VAT handling is governed by EU law:

- Customers from non-EU countries will not be charged VAT.
- Customers from Germany will be charged 19% VAT (MwSt.).
- Customers from all other EU countries must provide their VAT identification number to avoid VAT being added to the invoice.

Support

We offer optional support contracts in combination with a new product license, or to renew an existing support contract. Customers with an active support contract will benefit from the following advantages:

- technical support with short response times
- all minor (maintenance) and major (functional) updates included
- early availability of bug fixes
- maintenance releases and technical support available until the end of a product's lifetime
- additional licenses can be purchased until the end of the lifetime

For a detailed description of support benefits please refer to our General License and Support Conditions which are available on our Web site. The support fee is 18% of the license fee per year.

Support contracts can optionally be renewed automatically every 12 months until the support is expressly terminated by the customer.

Scope of a License

One license covers a single computer running under the selected operating system (platform), regardless of the number of CPUs. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each purchase. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-balancing servers require a license for every server in the group.

Operating System Platform

Supplying the name of the target operating system platform is a strict requirement since the license is bound to a specific platform. The license is valid for all supported language bindings (programming languages) on the selected platform.

A separate price list is available for IBM i5/iSeries and zSeries. AIX packages can also be used with PHP and Zend on i5/iSeries (see PDFlib GmbH Web site for details).

Volume Discounts

Volume discounts are available for multiple licenses of the same product according to the table below, provided all licenses are ordered with a single combined order.

number of licenses	discount off the list price
5	10%
10	15%
20	40%
50	60%
100	75%
200	80%

Updates of older Versions

An update changes an existing license to a license for a functionally enhanced version of the same product on the same platform. An update invalidates the old license. A valid license key must be supplied with an update order. The following table indicates the fees for various update combinations as a percentage of the target product's list price:

To	Update from PLOP 3 or PLOP DS 3
PLOP 4.1	60% of the target product's
PLOP DS 4.1	list price for all combinations

Upgrades

An upgrade changes an existing license for PLOP 4.x to a license for PLOP DS 4.1 on the same platform. An upgrade invalidates the old license. A valid license key must be supplied with an upgrade order:

To	Upgrade from PLOP 4.x
PLOP DS 4.1	50% of list price for PLOP DS 4.1

Premium Licenses

In addition to machine-based licenses PDFlib GmbH offers Premium licenses with extended rights, such as site licenses, integration licenses, and source code licenses.

Premium licenses are available at a fixed license fee and do not require any additional royalties. Please contact premium@pdflib.com for more information about these license types.
