## Licensing Notes

More information about licensing and support details can be found on [www.pdfliib.com](http://www.pdfliib.com) and the »PDFlib GmbH License Guide«.

### Products

All PLOP packages contain combined binaries which cover two products:

- PLOP is a versatile tool which can repair, linearize, optimize, encrypt, and decrypt PDF documents, and deal with XMP metadata;
- PLOP DS (Digital Signature) offers all features of PLOP plus the ability to apply digital signatures to PDF documents.

Both products can be evaluated without a license, but some features are restricted unless a valid license key is applied (see manual).

According to your order the license key will activate PLOP or PLOP DS.

### PLOP Features

PDFlib PLOP is engineered for server and desktop use and offers the following features:

- PDF linearization for fast Web delivery (byteserving).
- Optimization: reduce the file size of PDF documents without affecting quality.
- Password security: encrypt or decrypt PDF documents and apply or remove permission settings, such as »printing not allowed« or »content extraction not allowed«.
- Certificate security: encrypt PDF documents for a closed set of recipients which are identified by their digital certificates.
- Repair mode: automatically detect damaged PDF documents and fix the problems if possible.
- PDF analysis: query arbitrary properties of a PDF document with the integrated pCOS interface.
- Document info entries: query, add, or replace document info entries.
- XMP metadata: add XMP and synchronize document info.

### PLOP DS Features

PLOP DS (Digital Signature) offers all features of PLOP plus the ability to apply digital signatures to PDF documents. All relevant flavors and standards are supported:

- signatures conform to PDF/A, PDF/UA, PDF/X and PDF/VT
- time-stamping and Long-Term Validation (LTV)
- supports the PAdES standard (PDF Advanced Electronic Signatures)
- modern algorithms such as Elliptic Curve including Brainpool
- signature visualization, e.g. with a logo or scanned handwriting
- signing certificate can be software- or hardware-based (e.g. USB token or smartcard).
- A Hardware Security Module (HSM) can be used for high-volume signing.

### Support

We offer optional support contracts in combination with a new product license or to renew an existing support contract. Active support includes the following advantages:

- technical support with short response times
  - all minor (maintenance) and major (functional) updates included
  - early availability of bug fixes
  - maintenance releases and technical support available until the end of a product's lifetime
  - additional licenses can be purchased until the end of the lifetime
- Customers without an active support contract can only use the licensed version, but not any later maintenance updates. This differs from earlier versions where we offered maintenance updates on a voluntary basis.

The support fee is 20% of the license fee per year.

### Scope of a License

One license covers a single computer running on the selected operating system platform. The license includes all virtual machines (VMs) and logical partitions (LPARs) provided the VMs run under the same operating system. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each purchase. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-balancing servers require a license for every server in the group.

### Operating System Platform

Supplying the name of the target operating system platform is a strict requirement since the license is bound to a specific platform. Refer to the corresponding system requirements document for deployment details. The license is valid for all supported language bindings (programming languages) on the selected platform.

### Volume Discounts

Volume discounts are available for multiple licenses of the same product according to the table below, provided all licenses are ordered with a single combined order. Please contact us for larger numbers of licenses.

number of licenses	discount off the list price
5	10%
10	15%
20	40%

### Major Updates

A major update changes an older license to a license for a newer major version on the same platform, thereby invalidating the old license. A valid license key must be supplied with each update order. PLOP 4 licenses can be updated to PLOP 5.1, or PLOP DS 4 licenses to PLOP DS 5.1 at a reduced license fee.

Customers without a support contract can add support with a major update. In this case the support fee is based on the full license fee of the product (not the update fee):

To	Update from	
	PLOP 4	PLOP DS 4
PLOP 5.1	60% <sup>1</sup>	–
PLOP DS 5.1	–	60%

1. Percentage of the target product's list price

### Minor Updates

A minor update changes a license for an older maintenance release to a license for a newer maintenance release (minor version) on the same platform. The fee for minor updates is 20% of the list price of the target product.

### Premium Licenses

In addition to machine-based licenses PDFlib GmbH offers Premium licenses with extended rights, such as site licenses, integration licenses, and source code licenses. Premium licenses are available at a fixed license fee and do not require any additional royalties. Please contact [premium@pdfliib.com](mailto:premium@pdfliib.com) for more information about Premium licenses.
