# Licensing Notes for i5 and zSeries

## **TET Features**

PDFlib TET (Text Extraction Toolkit) reliably extracts text, images and metadata from PDF documents. TET makes available the text contents of a PDF as Unicode strings, plus detailed glyph and font information as well as the position on the page. Images are extracted in common raster formats. TET optionally converts PDF documents to an XML-based format called TETML which contains text, image, and metadata as well as resource information.

TET supports Chinese, Japanese, and Korean (CJK) text as well as right-to-left languages such as Hebrew and Arabic.

TET contains advanced content analysis algorithms for determining word boundaries, grouping text into columns and removing redundant text. Using the integrated pCOS interface you can retrieve arbitrary objects from the PDF, such as metadata, interactive elements, etc.

With PDFlib TET you can:

- Implement the PDF indexer for a search engine
- Repurpose the text and images in PDFs
- Develop software to convert the contents of PDFs to other formats
- Process PDFs based on their contents, e.g. splitting based on headings (requires PDFlib+PDI in addition to TET)

TET is suitable for server use (thread-safe and robust, no memory leaks, clean exception handling). A detailed description of TET features can be found in the documentation.

## **Value added Tax (VAT)**

Like all EU businesses, PDFlib GmbH's invoicing and VAT handling is governed by EU law:

- Customers from non-EU countries will not be charged VAT.
- Customers from Germany will be charged 19% VAT (MwSt.).
- Customers from all other EU countries must provide their VAT identification number to avoid VAT being added to the invoice.

## **Support**

We offer optional support contracts in combination with a new product license, or to renew an existing support contract. Customers with an active support contract will benefit from the following advantages:

- technical support with short response times
- all minor (maintenance) and major (functional) updates included
- early availability of bug fixes
- maintenance releases and technical support available until the end of a product's lifetime
- additional licenses can be purchased until the end of the lifetime

For a detailed description of support benefits please refer to our General License and Support Conditions which are available on our Web site. The support fee is 18% of the license fee per year.

Support contracts can optionally be renewed automatically every 12 months until the support is expressly terminated by the customer. In order to terminate a support agreement with automatic renewal please inform us one month before the support expires.

## **Server Identification**

Please enter the serial number, model, and processor feature of the target server (for i5/iSeries) or CPU ID (for zSeries) in the designated form fields on the previous page. The purchased license is bound to the server identified here and covers all logical partitions (LPARs) on this server.

Instructions for determining the server ID can be found on the FAQ section of the PDFlib GmbH Web site.

## **Server Platform**

Please check the target system, i.e. i5/iSeries or zSeries, and (for zSeries only) the Mips number. You will receive a system-specific license key which must be applied according to the documentation. We support a wide variety of additional operating systems. Please review the information on our Web site if you are interested in using PDFlib GmbH products on other platforms.

## **Volume Discounts and Discounts for Backup Machines**

Volume discounts are available for multiple licenses of the same product, provided all licenses are ordered with a single combined order:

- If 2 or more licenses are ordered, 25% discount off the list price is granted for all licenses.
- Licenses for backup machines are available at 85% discount off the list price, provided the backup machine is never used concurrently with the main production machine.

Volume discounts and discounts for backup machines cannot be combined. Please contact us for discounts on higher numbers of licenses.

## **Free Updates with active Support**

Customers with a support agreement are eligible for a free update to TET 4.1. The free update must be requested during the active period of the support agreement. For example, if you terminate your support agreement in October 2012, you can no longer request a free update after this date.
