## Licensing Notes

### TET Features

PDFlib TET (Text Extraction Toolkit) reliably extracts text, images and metadata from PDF documents. TET makes available the text contents of a PDF as Unicode strings, plus detailed glyph and font information as well as the position on the page. Images are extracted in common raster formats. TET optionally converts PDF documents to an XML-based format called TETML which contains text, image, and metadata as well as resource information. TET supports Chinese, Japanese, and Korean (CJK) text and right-to-left languages such as Hebrew and Arabic.

TET contains advanced content analysis algorithms for determining word boundaries, grouping text into columns and removing redundant text. Using the integrated pCOS interface you can retrieve arbitrary objects from the PDF, such as metadata, interactive elements, etc.

With PDFlib TET you can:

- ▶ Implement the PDF indexer for a search engine
- ▶ Repurpose the text and images in PDFs
- ▶ Develop software to convert the contents of PDFs to other formats
- ▶ Process PDFs based on their contents, e.g. splitting based on headings (requires PDFlib+PDI in addition to TET)

TET is suitable for server use (thread-safe and robust, no memory leaks, clean exception handling). A detailed description of TET features can be found in the documentation.

### Value added Tax (VAT)

PDFlib GmbH's invoicing and VAT handling are governed by EU law:

- ▶ Customers from non-EU countries will not be charged VAT.
- ▶ Customers from Germany will be charged 19% VAT (MwSt.).
- ▶ Customers from all other EU countries must provide their VAT identification number to avoid VAT being added to the invoice.

### Support

We offer optional support contracts in combination with a new product license, or to renew an existing support contract. An active support contract includes the following advantages:

- ▶ technical support with short response times
- ▶ all minor (maintenance) and major (functional) updates included
- ▶ early availability of bug fixes
- ▶ maintenance releases and technical support available until the end of a product's lifetime
- ▶ additional licenses can be purchased until the end of the lifetime

Customers without an active support agreement can only use the licensed version, but not any later maintenance updates. This differs from earlier versions where we offered maintenance updates on a voluntary basis.

For a detailed description of support benefits refer to our General License and Support Conditions which are available on our Web site. The support fee is 20% of the license fee per year.

Support contracts can optionally be renewed automatically every 12 months until the support is expressly terminated by the customer. In order to terminate a support agreement with automatic renewal please inform us one month before the support expires.

### Scope of a License

One license covers a single computer running on the selected operating system platform. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each purchase. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-

balancing servers require a license for every server in the group. A license covers all virtual machines (VMs) and logical partitions (LPARs) on a computer.

### Operating System Platform

Supplying the name of the target operating system platform is a strict requirement since the license is bound to a specific platform. Refer to the corresponding system requirements document for deployment details. The license is valid for all supported language bindings (programming languages) on the selected platform.

A separate price list is available for IBM zSeries systems.

### Volume Discounts

Volume discounts are available for multiple licenses of the same product according to the table below, provided all licenses are ordered with a single combined order. Please contact us for larger numbers of licenses.

number of licenses	discount off the list price
5	10%
10	15%
20	40%
50	60%
100	75%
200	80%

### Updates of older Versions

An update changes an older license to a license for a newer version on the same platform, thereby invalidating the old license. A valid license key must be supplied with each update order.

The following table indicates the fees for updates as a percentage of the target product's list price:

To	Update from TET 3
TET 4.2	60% of the target product's list price

### Free Updates with active Support

Customers with a support agreement are eligible for a free update to TET 4.2. The free update must be requested during the active period of the support agreement. For example, if you terminate your support agreement in October 2013, you can no longer request a free update after this date.

### Premium Licenses

In addition to machine-based licenses PDFlib GmbH offers Premium licenses with extended rights, such as site licenses, integration licenses, and source code licenses. Premium licenses are available at a fixed license fee and do not require any additional royalties.

Please contact [premium@pdflib.com](mailto:premium@pdflib.com) for more information about Premium licenses.
