

Table size is defined as 350.0 x 400.0  
No row height is defined

Result:

Row height will be calculated automatically

With two rows available it will be half of the table height  
(with three rows it will be a third of the table height, etc.)

As a result each row will have the same height

	<p>Long Distance Glider: With this paper rocket you can send all your messages even when sitting in a hall or in the cinema pretty near the back.</p>
	<p>Giant Wing: An unbelievable sailplane! It is amazingly robust and can even do aerobatics.</p>

Table size is defined as 350.0 x 400.0  
For the first row rowheight=1 is defined  
For the second row rowheight=1 is defined

Result:  
rowheight=1 defines the minimum height of the row. The height will be increased automatically as the object needs more space to be fit

	Long Distance Glider: With this paper rocket you can send all your messages even when sitting in a hall or in the cinema pretty near the back.
	Giant Wing: An unbelievable sailplane! It is amazingly robust and can even do aerobatics.

Table size is defined as 350.0 x 400.0  
For the first row rowheight=70% is defined  
For the second row rowheight=30% is defined

**Result:**

The height of the first row will be 70% of the table height

The height of the second row will be 30% of the table height

	<p>Long Distance Glider: With this paper rocket you can send all your messages even when sitting in a hall or in the cinema pretty near the back.</p>
	<p>Giant Wing: An unbelievable sailplane! It is amazingly robust and can even do aerobatics.</p>

Table size is given as 350.0 x 400.0  
For the first row rowheight=200.0 is defined  
For the second row rowheight=100.0 is defined

**Result:**  
rowheight defines the minimum row height. Since the objects need less space it does not have to be increased. Parts of the table fitbox will be left empty

	<p>Long Distance Glider: With this paper rocket you can send all your messages even when sitting in a hall or in the cinema pretty near the back.</p>
	<p>Giant Wing: An unbelievable sailplane! It is amazingly robust and can even do aerobatics.</p>
