## Licensing Notes

More information about licensing and support can be found at [www.pdflib.com](http://www.pdflib.com).

### TET Features

PDFlib TET (Text and Image Extraction Toolkit) reliably extracts text, images, comments and metadata from PDF documents. TET makes available the text contents of a PDF as Unicode strings, plus detailed color, glyph and font information as well as the position on the page. Images are extracted in common raster formats. TET optionally converts PDF documents to an XML-based format called TETML which contains text and metadata as well as resource information. TET supports Chinese, Japanese, and Korean (CJK) text and right-to-left languages such as Hebrew and Arabic.

TET contains advanced content analysis algorithms for determining word boundaries, grouping text into columns and removing redundant text. Using the integrated pCOS interface you can retrieve arbitrary objects from the PDF, such as metadata, interactive elements, etc.

With PDFlib TET you can:

- ▶ implement the PDF indexer for a search engine
- ▶ repurpose the text and images in PDFs
- ▶ convert the contents of PDFs to other formats
- ▶ process PDFs based on their contents, e.g. page-based splitting according to headings (requires PDFlib+PDI in addition to TET)

TET is suitable for server use (thread-safe and robust, no memory leaks, clean exception handling). A detailed description of TET features can be found in the documentation.

### Value added Tax (VAT)

PDFlib GmbH's invoicing and VAT handling are governed by EU law:

- ▶ Customers from non-EU countries will not be charged VAT.
- ▶ Customers from Germany will be charged VAT (MwSt.).
- ▶ Customers from all other EU countries must provide a valid VAT identification number. Orders without a valid VAT ID cannot be processed.

See [www.pdflib.com/buy/direct-sales/vat](http://www.pdflib.com/buy/direct-sales/vat) for more information.

### Support

We offer optional support contracts in combination with a new product license or to renew an existing support contract. Active support includes the following advantages:

- ▶ technical support with short response times
- ▶ all minor (maintenance) and major (functional) updates included
- ▶ early availability of bug fixes
- ▶ maintenance releases and technical support available until the end of a product's lifetime
- ▶ additional licenses can be purchased until the end of the lifetime

Customers without active support can only use the licensed version, but not any later maintenance updates.

The support fee is 20% of the license fee per year.

The fee for one year support renewal is 20% of the license fee of the current maintenance release of the licensed product at the time of renewal.

Support can optionally be renewed automatically every 12 months until it is terminated by the customer.

### Scope of a License

One license covers a single computer running on the selected operating system platform. The license includes all virtual machines (VMs) provided the VMs run under the same operating system. Development licenses for machines which are not used for production purposes and run under the same operating system are free with each license. Redundant (backup) machines do not require a separate license, provided they are never used concurrently with the actual production machines. Groups of load-balancing servers require a license for every server in the group.

### Operating System Platform

The target operating system platform must be specified with each order since the license is bound to a specific platform. Refer to the corresponding »system requirements« document for deployment details. The license is valid for all supported language bindings (programming languages) on the selected platform.

### Invoicing and Delivery

Orders are usually processed within one business day. Customers in the Americas, Australia and Japan will be invoiced in US-\$, all other regions in Euro.

After processing your order we will send you an invoice and the license key(s). The software can be downloaded from [www.pdflib.com](http://www.pdflib.com).

### Volume Discount

Volume discounts are available for multiple licenses of the same product, provided all licenses are ordered with a single combined order:

- ▶ 5 or more licenses, updates or upgrades: 10% discount
- ▶ 10 or more licenses, updates or upgrades: 15% discount

Please contact us for larger numbers of licenses (see [www.pdflib.com/buy/direct-sales/volume-discounts](http://www.pdflib.com/buy/direct-sales/volume-discounts)).

### Major Update

A major update changes an older license to a license for a newer major version on the same platform, thereby invalidating the old license. A valid license key must be supplied with each update order. Licenses for TET 4 can be updated to TET 5.4 at a reduced license fee.

Customers without a support contract can add support with a major update. In this case the support fee is based on the full license fee of the product (not the update fee).

to	major update from TET 4
TET 5.4	60% of the target product's list price

### Minor Update

A minor update changes a TET 5.x license to a license for a newer maintenance release (minor version) on the same platform. The fee for minor updates is 20% of the list price of the target product.

### Premium License

In addition to machine-based licenses PDFlib GmbH offers Premium licenses with extended rights such as site licenses and integration licenses. Please contact [premium@pdflib.com](mailto:premium@pdflib.com) for more information about Premium licenses.

### License and Support Conditions

All sales are governed by our General License and Support Conditions which are available at [www.pdflib.com](http://www.pdflib.com). Additional conditions apply to Premium licenses.
