

Page 1:

Place the full image in its original size, with a transparency of 50%

Place a part of the image in its original size at the position as it would appear in the full image

Place a part of the image in its original size at the lower left corner of the full image

Page 2:

Output a part of the image in its original size:

```
p.fit_image(image, x, y, "matchbox={clipping={35% 35% 75% 75%}}");
```

Place a part of the image in a given box:

```
p.fit_image(image, x, y, "matchbox={clipping={35% 35% 75% 75%}} boxsize={300 200} fitmethod=meet showborder");
```
