PDFlib

Products

Overview

The PDFlib Product Family

PDFlib is the leading developer toolbox for generating and manipulating files in Adobe's well known Portable Document Format (PDF). PDFlib's main targets are dynamic PDF creation on a Web server or any other server system, and to implement »Save as PDF« in existing applications. You can use PDFlib to dynamically create PDF documents from database contents, similar to dynamic Web pages. PDFlib has proven itself in a wide range of other use cases as well.

The PDFlib product family is available in three different flavors: PDFlib, PDFlib+PDI (PDF Import), and PDFlib Personalization Server (PPS). The product family integrates the auxiliary pCOS interface to retrieve arbitrary objects from the PDF, such as metadata, interactive elements, etc. PDFlib offers all functions required to generate PDF documents with text, graphics, images, and interactive elements such as annotations or bookmarks.

PDFlib+PDI includes all PDFlib functions plus the PDF Import Library (PDI). With PDI you can open existing PDF documents and incorporate some pages into the PDFlib output. It also includes the pCOS interface for querying PDF objects.

PDFlib Personalization Server (PPS) includes PDFlib+PDI plus additional functions for variable data processing using PDFlib blocks. PPS makes applications independent from any layout changes.

The designer creates placeholders for variable text and images using the PDFlib Block Plugin for Acrobat. These so called Blocks contain a variety of properties, such as font size, color, and image scaling. On the server PDFlib Personalization Server can fill these Blocks with variable data to create the final output, for example from a database.

PDFlib PLOP

PDFlib PLOP is a versatile tool for linearizing, optimizing, repairing, analyzing, encrypting and decrypting PDF documents. PLOP linearization and optimization features create efficient and small PDF documents for fast Web delivery. PLOP protection features encrypt or decrypt PDF documents and apply or remove permission settings, such as »printing not allowed« or »content extraction not allowed«. PLOP's repair mode automatically detects damaged PDF documents and fixes the problems if possible. PLOP can also insert XMP metadata in a PDF/A-conforming manner.

PDFlib PLOP DS

The extended version PLOP DS offers all features of PLOP plus the ability to apply digital signatures to PDF documents. The signatures can be validated in Adobe Acrobat and Adobe Reader, without the need for any additional software. Signatures can be created from digital IDs in the common PKCS#12 and PFX certificate formats or from cryptographic tokens (e.g. smartcards). On Windows digital IDs from the Windows certificate store can also be used.

PDFlib TET

The patented PDFlib Text Extraction Toolkit (TET) is a developer product for reliably extracting text, images and metadata from PDF documents. TET makes available the text contents of a PDF as Unicode strings, plus detailed glyph and font information as well as the position on the page. In addition, TET contains advanced content analysis algorithms for determining word boundaries, grouping text into columns and removing redundant text, such as shadows or artificially bolded text. TET optionally converts PDF documents to an XML-based format.

PDFlib TET PDF IFilter

TET PDF IFilter extracts text and metadata from PDF documents and makes it available to search and retrieval software on Windows. This allows PDF documents to be searched on the local desktop, a corporate server, or the Web. TET PDF IFilter is based on the patented PDFlib Text Extraction Toolkit (TET).

PDFlib pCOS

PDFlib pCOS provides a simple and elegant facility for retrieving any information from a PDF document which is not part of the page contents. For example, PDF metadata, interactive elements (links etc.), or page dimensions can easily be queried with pCOS.

By processing multiple PDF documents with a single call you can easily create summaries of document info entries, page formats, fonts, or any other property.

The pCOS interface is available as a separate product, but it is also included in PDFlib+PDI, PDFlib Personalization Server, PDFlib PLOP, PDFlib PLOP DS, and PDFlib TET.

Benefits of using PDFlib Software

Rock-solid Products

Tens of thousands of programmers worldwide are working with our software. PDFlib meets all quality and performance requirements for server deployment. All PDFlib products are suitable for robust 24x7 server deployment and unattended batch processing.

Speed and Simplicity

PDFlib products are incredibly fast – up to thousands of pages per second. The programming interface is straightforward and easy to learn.

PDFlib products all over the World

Our products support all international languages as well as Unicode. They are used by customers in all parts of the world. The Japanese Resource Kit for the PDFlib Family offers freely embeddable fonts, countryspecific ICC profiles, CMaps, and documentation for Japanese users.

Relevant Standards supported

PDFlib products support all relevant standards, like for example PDF/A, PDF/X, PDF/VT, PDF/UA, XMP metadata, ICC profiles, or the Pantone® and HKS® color libraries.

Professional Support

If there's a problem, we will try to help. We offer commercial support to meet the requirements of your business-critical applications. By adding support you will have access to the latest versions, and have guaranteed response times should any problems arise.

Library or Command-Line Tool?

All PDFlib products are available as a programming library (component) for various development environments. PLOP, PLOP DS, TET and pCOS are also available as a command-line tool for batch operations.

Who uses PDFlib Products?

Customers from a variety of industries and businesses make use of the powerful PDFlib products, for example:

- ▶ Software developers integrate PDFlib into all kinds of applications to enable reliable and high-quality PDF output.
- ▶ Businesses create their invoices with PDFlib. Dynamic invoice generation is one of the most popular scenarios.
- ▶ Bulk mailers merge personal data to existing PDF documents.
- ▶ Invoices and reports can be created from office applications.
- ▶ Prepress companies use PDFlib to build systems for creating, assembling, or personalizing PDF for commercial printing.
- ▶ Phone companies generate monthly phone bills with PDFlib.
- ▶ Archive departments extract text from existing PDF documents with PDFlib TET for repurposing the contents.
- ▶ Search engines can index PDFs with PDFlib TET.
- ▶ Web developers automatically optimize PDF content for fast Web delivery with PDFlib PLOP.
- ▶ Companies encrypt confidential PDF documents with PDFlib PLOP. For additional fidelity digital signatures can be added with PDFlib PLOP DS.
- ▶ Service providers can automatically check incoming PDF documents for a variety of criteria using PDFlib pCOS.

Supported Development Environments

PDFlib products are everywhere – they run on practically all computing platforms. We offer variants for all common flavors of Windows, Mac OS, Linux and Unix, as well as for IBM i5/iSeries and zSeries systems.

The core is written in highly optimized C code for maximum performance and small overhead. Via a simple API (Application Programming Interface) the functionality is accessible from a variety of development environments:

- ▶ COM for use with VB, ASP, etc.
- ▶ C and C++
- ▶ Cobol (IBM zSeries) (PDFlib product family only)
- ▶ Java, including servlets and Java Application Server
- ▶ .NET for use with C#, VB.NET, ASP.NET, etc.
- ▶ PHP
- ▶ Perl
- ▶ Python
- ▶ REALbasic
- ▶ RPG (IBM i5/iSeries)
- ▶ Ruby

Licensing

We offer various licensing programs for server licenses, integration and site licenses, and source code licenses. Support contracts for extended technical support with short response times and free updates are also available.

About PDFlib GmbH

PDFlib GmbH is completely focused on PDF technology. Customers worldwide use PDFlib products since 1997. The company closely follows development and market trends, such as ISO standards for PDF. PDFlib GmbH products are distributed all over the world with major markets in North America, Europe, and Japan.

Contact

Fully functional evaluation versions including documentation and samples are available on our Web site. For more information please contact:
